Hello [Redacted]

Could you please have some respond back to the following consumer email question at there earliest convenience?

Thank you very much,
[Redacted]

Subject: No Brakes No Warning

I have a 2007 Dodge Sprinter 2500.

MC
2/19/09
WT

A few weeks ago I found myself attempting to stop and had no brakes.
Despite so many "idiot lights" in my dash - nothing lit up.
The problem was a melted brake vacuum hose.
I get warned when my seatbelt is off - How is it possible that a 2007
automobile can be produced to operate in traffic and have absolutely no
driver warning device to advise the driver he has no brakes?
