Subject: 2005 pt cruiser convertable

OCT 26 2009

To whom this may concern.

My wife and I were recently driving her 2005 PT cruiser and I felt a vibration in the floor. I jacked up the car and determined that the front wheel bearing was defective. This car is only driven in the summer in Michigan. It has 26686 miles on it. This is way too soon for a wheel bearing to wear out. I would like to know if there was a recall or a repair procedure on this.

Thanks [REDACTED]
