Dear Sir/Ms

I have a recalled Toyota Tundra, VIN #
5TBBT4411YS [REDACTED] (2000 model). My spare
passed me on the busy summer of 2008! I had
a new muffler installed shortly after and
installer warned me of excessive frame corrosion!

Problem is this: I've been driving a
rented car since early April - an Subaru
Impreza provided by Toyota Bount Mary. I need
a truck, not a compact car! I build furn-
iture and do a lot of gardening - which
requires a truck. Toyota has not
done anything about the recall.

The Toyota Case # is #1003-181-968 and I
have gotten a "run around."

yours Truly
