Dear [REDACTED]

Thank you for your correspondence concerning your model year (MY) 2009 Toyota Tundra. The U.S. Consumer Product Safety Commission forwarded your correspondence to the National Highway Traffic Safety Administration's (NHTSA) Office of Defects Investigation.

NHTSA is the Federal agency responsible for improving safety on our Nation's highways. We are authorized to order manufacturers to recall and repair vehicles or motor vehicle equipment when our investigations indicate that they contain safety defects in their design, construction, or performance. We also monitor the adequacy of manufacturers' recall campaigns. In order for the agency to initiate an investigation, we look carefully at the body of consumer complaints and other available data to determine whether a defect may exist. We cannot act on isolated problems or resolve disputes between individual owners, dealers, or manufacturers.

We appreciate the report you provided. Reports from motorists are a very important source of information for us. In your letter you indicated that your MY 2009 Toyota Tundra hydroplaned and went out of control. Your vehicle landed in water filled ravine from which you had to swim to safety.

We have reviewed our database in an effort to identify whether a safety defect trend exists with regard to hydroplaning problems in MY 2009 Toyota Tundra vehicles. At this time, there is insufficient evidence to warrant opening a safety defect investigation. The information you provided has been entered into our database. It will be considered with future reports to identify any safety defect trends that may require our attention.

Should you encounter a safety-related problem with a motor vehicle or item of motor vehicle equipment in the future, we would appreciate it if you would complete an electronic Vehicle Owner's Questionnaire online at www.nhtsa.dot.gov/ivoq or call the Auto Safety Hotline at 1-888-327-4236. Also, a summary listing of vehicle owners' complaints, safety recalls, manufacturers' service bulletins, etc. can be obtained at www.nhtsa.dot.gov/cars/problems.

Sincerely,

Randy Reid, Chief
Correspondence Research Division
Office of Defects Investigation
