Dear Randy.

I appreciate your response, about my acceleration problems, with my 2007 Toyota Corolla. Enclosed is a copy of a recall, that Toyota sent me. The circuit board was replaced, by a Toyota dealer, in Superior, Wis. I do believe, that the acceleration problem, on my Toyota Corolla, probably is resolved now. I also believe that this recall, was Toyota's way of dealing with the situation, without admitting there was an acceleration problem, in the first place, & probably a lot of pressure from your department.

Thank you so very kindly, for your concern.

God bless -

VIN: 1NXBR32E67Z

Dear Toyota Owner:

This notice is being sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Toyota has decided that a defect, which relates to motor vehicle safety, exists in the Engine Control Module (ECM) for certain 2005 through 2008 Toyota Corolla and Corolla Matrix models equipped with the 1ZZ-FE engine and two-wheel drive.

**What is the condition?**

The ECM for certain 2005 through 2008 Toyota Corolla and Corolla Matrix models equipped with the 1ZZ-FE engine and two-wheel drive may have been improperly manufactured. There is a possibility that a crack may develop at certain solder points or on varistors on the circuit board. In most cases, if a crack occurs at certain points or on certain varistors, the engine warning lamp could be illuminated\*, harsh shifting could result, or the engine may not start. In limited instances, if cracking occurs on particular solder points or varistors, the engine could stop while the vehicle is being driven which may increase the risk of a crash.

\*Please note the engine warning lamp may illuminate for reasons unrelated to this condition.

**What is Toyota going to do?**

**The replacement part for your vehicle is now available.** Any Toyota dealer will inspect the part number and the lot number located on the ECM. If the ECM is found to be one that requires replacement, the dealer will do so at **NO CHARGE** to you.

**What should you do?**

**This is an important Safety Recall**

Please contact your authorized Toyota dealer to make an appointment to have this important remedy performed on your vehicle as soon as possible.

The ECM replacement will take approximately one hour. However, depending on the dealer's work schedule, it may be necessary to make your vehicle available for a longer period of time.

**You do not need an owner letter to have this recall completed; however, to assist the dealer in confirming vehicle eligibility, we request that you present this notice at the time of your service appointment.**
