Gentleman;

In reference to my case #10339681 about the rubber brake pad falling off my Nissan Altama 1N4BL21E49C [REDACTED] 2009, it has happened again. Pulling out of the drive way Again I found the rubber pad of the brake pedal on the floor and again I went to my Nissan dealer He examined the rubber pad and told me he could do nothing else to fix it but to call Nissan,s hot line. I did so . I expect that they will call me ASAP.

This is the second time this has accrued. They replace the first pad with a new pad but for sure This in not the answer to the problem.

Please see what you can do.
