Washington, DC 20590 ...

Dear Sir or Madam:

Maybe I am the first one to complain, in which case, I have a 2006 Jaguar
~~X~~-Type and the seat belt refuses to connect properly. Once it is buckled,
it detaches upon going over bumps or sudden pressure on it.

The car has only 5,845 miles on it and I have talked to representatives of
Jaguar customer service and they want to avoid responsibility in this
matter.

I have had the car at the dealership several times and then contacted the
corporate office. The car presents a safety issue due to the failure of the
seat belt causing the airbag not to engage.

Could you help me in this matter. Any help will be appreciated.

Sincerely,

File, copy to Heidi of Jaguar Corp., Jaguar of Louisville-Mgr.
