Wayne Currier (U-Drive)
Attorney General

Dear Sir/Meme:

On January 21st of 2010 I purchased a used vehicle from Wayne Currier owner of U-Drive on route 50 in Ballston Spa New York. Since that time it has broken down a total of 9 times 5 of which Mr. Currier had it towed to his garage and once Mr. Currier met me and got the vehicle running and then replaced the battery that his employees were suppose to do that day while they were replacing the fuel pump.

The problems with this vehicle has been way more then my budget can handle such as starter has been replaced twice now, studs and lug nuts due to tire falling off on way to work. Bolts and accerey bracket for alternator and power steering due to only one bolt on vehicle. Tires had to be replaced due to original were not good even though I paid \$140.00 already for a set. Not to mention all the starting fluid picked up due to starting problem. Replaced cold air intake filter due to there be not any.

When one buys a vehicle from a used car lot one expects it to work with very little maintained for at least 6 months if not for a year. Yes Mr. Currier did inform me that the vehicle needed bolts for accerey bracket, 4 wheel drive accuator which is disengaged at present due to \$44.00 for 4 wheel drive with all other problems seems not able to do. Also informed that stabilizer bar when actually it really is the pitmen arm, hub wheel assembly and ball joints upper and lower. There are so many issues with this vehicle that Mr. Currier should never of sold it or at least done more work on the vehicle. In addition Mr. Currier's garage does not do their inspections properly they took off the left wheel to inspect brakes and yet that is the wheel that fell off during driving to work. Not to mention Mr. Currier passed the inspection with no emergency brake in vehicle and Mr. Currier knew about it.

Overall I feel Mr. Currier should not be in business due to he knows lemon laws and with a vehicle like my 94 Chevy S10 Blazer it was over lemon laws for mileage by 86 miles and under lemon law for money amount by \$600.00. So either way Mr. Currier knew what he was doing with this vehicle by selling it when lemon law does not cover it as well as he claimed he had no more responsibility to vehicle once I drove it off lot cause it was like buying a car off side of road. I am sorry, their I probably would have been better off cause for \$900.00 for vehicle and \$1,200.00 for parts no labor cost and extra transportation needed to work was not worth what I have been through with this vehicle but I do love the Blazer just not headaches with it.

NOT THE ONLY ONE
