In re: Toyota's defective products

Dear Commission,

My mother suffered a near fatal
ear crash. She was driving a Toyota product
(i.e., Lexus ES 300, 1999 model). I am
trying to obtain information about Toyota's
defective products.

My Mom suffers lasting/life-long physical
and mental disabilities due to said crash.

Please help if you can by providing me
with info on whether or not my mom's
car had the defective product in it.

Thank you!
