

To NHTSA representative.

NUS20C

OCT 13 2010

From:

CL-10364647-7599

CHULA VISTA CA.

We owned a chevrolet
HHR model LS 2007
Mileage currently 59,230 K

VIN # 3GNDA13D77S

we are writting this note, because this is the second
time that this happens to us.

When is raining, and if you start driving the car and if
you push the brake pedal a littlebit hard, the brakes locks
and the vehicle don't stops.

So far we have not been involved in any accident because
we have been driving slowly when this happened.

Our main concern is that we don't think that it could
be posible, that if a little rain hit and you depress
the brake pedal a littlebit hard the brakes get locked
and the car ~~doen't stop~~ doesn't stop.

Thankyou for your time.
