---

My 2000 A6 was totaled because of a ABS malfunction. The person who was driving my car rear ended a person. I was reading in MYCARSTATS.COM How this is a issue.

THE ABS LIGHT COMES ON STEADY, THE HAND BRAKE LIGHT FLASHED CONSTANTLY, AND THREE WARNING BEEPS ARE HEARD. A COMPUTER READING SAYS THERE IS NO CONNECTION WITH THE ABS UNIT. THE ABS DOESNT WORK AT ALL. IT SOMETIMES OCCURS WHEN I FIRST START THE CAR, AND SOMETIMES AFTER DRIVING FOR A WHILE.

Thank You,
