Subject: defective rear seat belts in 1998 Lincoln continental
Date: Monday, January 03, 2011 8:26:43 AM

My Lincoln Continental's right and left rear seat belts do not retract any more....they got stuck or something. My kids seat back there and this is a safety issue and not sure if it is required by law. I have heard of the fronts doing this in the Lincoln and a recall happened.

Also my passenger front light lets in water and retains water and then fogs up. These kind of things I should not have to pay for I feel.
