Re: My letter 1/8/2011 (No response to date)
Subject: 2004 Toyota Camry LE
Unintended Acceleration

Once again, I have had the following experiences with the subject vehicle.

1) 11/2016 While parking my car at an Aldi's Food Market, the car accelerated at a high rate of speed hitting a brick wall. This happened with my foot on the brake. The net result:
   a) Front End damage to my vehicle
   b) Extensive damage to the brick wall as well as internal damage
2) 2/2011 - Parking my car in my Church parking lot, the car accelerated at a high rate of speed knocking down an iron fence at a Children's playarea - all while my foot was on the brake. Net result:
   a) Front End damage to my vehicle.
   b) Iron Fence Needed to be Replaced

Note: An inspection was performed 4/2011 by an independent contractor employed by Toyota. They reported - no mechanical problems found.

3. [redacted]/2011 - While parking my car at the Cotswold Medical Center, the car accelerated at a high rate of speed hitting a brick wall while my foot was on the brake. Net result.
   a) Extensive front end damage to the Vehicle
   b) Extensive damage to the brick wall as well as internal damage of broken glass, etc.

DW

Note: Another inspection was done by someone contracted by Toyota. The result no mechanical problems.

4) Two weeks after the inspection while driving on US51 in Charlotte, I was braking to stop at a red light when by unintended acceleration. the car sped out of control there, the intersection hitting another vehicle. The net result.

a) The Insurance Co. declared my vehicle was a total loss.

b) The other vehicle had extensive rear-end damage.

Fortunately, no one was injured in all four accidents.

After contacting Toyota, their representatives were very rude to me and have done absolutely nothing to resolve this problem.

While Toyota has claimed they have not had any problems with the electrical system, ie computer, it is my contention they have not resolved what is causing the problem with unintended acceleration. This is still a serious problem and danger to the public at large.

I will appreciate a reply from you at your earliest convenience.
