Dear Sir,

I bought a 2007 Toyota Camry LE in Dec. of 2006.

I have had only one complaint with it. That is ever since I bought it.

it has been having a very loud screech in the rear brake on the passenger side. I have brought it to 3 different Toyota dealers and at all three I was told it was nothing but trash on the brake shoe and that it would wear off.

I've had my car for 4 yrs

1  
and the screech is still  
going strong. Although  
it does not happen all  
the time, it's very annoying  
when it does.

Dave had the tires cross-  
crossed a couple of times  
and the mechanics claim  
they don't see anything wrong.  
I would like to know  
what could be done about  
this and I am on a very  
limited budget and can  
not afford a big repair  
bill.

yours truly
