I met 6/6/11 at the dealership with a BMW factory rep. we went for a ride ,and the car wood still drift to the right.They are going to change out one tire and a wheel 245/45/19 LS2 eagle goodyears,also going to replace another wheel due to finish workmanship(fractory).if this does not solve the problem other steps will be taken .I might at that point go to lemon law over this vehicle, because it may never be right. Best Regards, [REDACTED]
