Gentlemen:

One day after our 2001 Ford F-150 caught fire and then exploded, we saw on TV that your administration was investigating a fuel tank problem with this pickup.

Our son had just returned from town with \$7,200 worth of seed corn. When he got out of the pickup he noticed flames. He didn't have time to get anything out before it exploded and completely burned out, including the seed corn.

Please let us know any comments you have on this problem. The seed corn was a huge loss.

Thank you,

[REDACTED]
