Egg Harbor Twp., NJ [REDACTED]

NVS-216 mec  
Ref. No. 10437134

Dear [REDACTED]

Thank you for your correspondence concerning your model year (MY) 2003 Ford Crown Victoria vehicle. Your correspondence was received by the National Highway Traffic Safety Administration's (NHTSA) Office of Defects Investigation.

NHTSA is the Federal agency responsible for improving safety on our Nation's highways. We are authorized to order manufacturers to recall and repair vehicles or motor vehicle equipment when our investigations indicate that they contain safety defects in their design, construction, or performance. We also monitor the adequacy of manufacturers' recall campaigns. In order for the agency to initiate an investigation, we look carefully at the body of consumer complaints and other available data to determine whether a defect trend may exist. However, we do not have authority to act on isolated problems or resolve disputes between individual owners, dealers, or manufacturers.

You state that the air bags in your MY 2003 Ford Crown Victoria vehicle did not deploy during a crash resulting in injuries to [REDACTED]. You asked Ford to inspect your vehicle but they have declined and are not taking any responsibility for the air bag non-deployment. You want to know why the air bags failed to deploy in the crash. In addition, you want to know if your vehicle was ever recalled for a problem with the air bags.

We have reviewed our database in an effort to identify whether a safety defect trend exists with respect to air bag non-deployment in MY 2003 Ford Crown Victoria vehicles. At this time, there is insufficient evidence to warrant opening a safety defect investigation. However, the information you provided has been entered into our database and will be considered with future reports to identify any safety defect trends that may require our attention. For your information, the NHTSA investigation and recall process can be found on our web site at [www.nhtsa.gov](http://www.nhtsa.gov).

There are a number of factors that can affect whether an air bag will deploy in a given crash; e.g., the angle of impact, the speed of the other vehicle, and the amount of force absorbed by the other vehicle or object that is impacted. Only an expert in crash reconstruction can provide an educated opinion as to whether the air bag in a vehicle should have deployed in a specific crash. We recommend that you continue to work with Ford to reach a resolution regarding your crash.

In addition, our database has revealed that your MY 2003 Ford Crown Victoria may be included in several safety-related recalls. However, there are no recalls for the air bag system. We have enclosed copies of the recall summaries for your information. Please contact your local Ford dealership or Ford Motor Company for further details and have your make, model, model year, and vehicle identification number available for their information so they can determine if your vehicle is affected by any of the recalls.

Should you encounter a safety-related problem with a motor vehicle or motor vehicle equipment in the future, we would appreciate it if you would complete an electronic Vehicle Owner's Questionnaire online at [www.nhtsa.dot.gov/ivoq](http://www.nhtsa.dot.gov/ivoq) or call the Auto Safety Hotline at 1-888-327-4236. Also, a summary listing of vehicle owners' complaints, safety recalls, manufacturers' service bulletins, etc. can be obtained at [www.nhtsa.gov](http://www.nhtsa.gov).

Sincerely yours,

A handwritten signature in cursive script that reads "Randy Reid".
