Complaint Number: 10440511

Reference: Brake Line Corrosion on GM Trucks

I am writing to update my submitted complaint. The GM Dealer has confirmed that the brake failure was a result of rusted out brake lines. This is consistent with the other recorded safety related events where brake line corrosion on this or other prior model year GM Trucks have resulted in brake failures. I am very concerned that someone is going to get hurt if this is not elevated to a recall or at least a warning to GM Truck Users. I consider myself to be very fortunate that the brakes failed at the end of my 400 mile trip and no was hurt. My family was in the vehicle at the time of the failure. Had they failed on the highway, I-95 in Maine, I-495 in Massachusetts, I-84 & I-91 in Ct., or the Merritt Parkway, the outcome could have been devastating.

I sincerely hope that you act on this complaint and the hundreds of others related to this type of failure.
