Subject: Re: Acknowledgement from NHTSA/ODI of your safety complaint

Very disappointed with the fact that a gas leak could have caused my vehicle to explode and NHTSA's only reasonable answer is we'll contact the vehicle manufacture, what if my family was injured or killed as a result of this fuel tubing expansion and vapor release as we had be driving on a trip or highway and the fumes had eiother gotten into vehicle causing driver to black out or spark from some source either inside or outside car made it explode. Seems to me NHTSA is more interested in Manufactures position and interest then public safety. If someone had been smoking or there was a lighted flame anywhere near my vehicle we wouldn't have this conversation, and if my handicap wife and 6 yrs grand child were alone driving what would you tell me sorry we'll look into the incident? Well i keep the parts and hoses for you if you can take the time to either retrieve them or possible run a case investigation at some time in the future please let me know. Thank you for your valueable time and excuse me for not being polite, as i only have one family to serve. [REDACTED]
