Re: Mazda Tribute Recall #6712A (VIN #4F2YU08112K [REDACTED])
File #139-922-660

Dear Administration Department:

During February, 2012, I received a written "Safety Recall #6712A from Mazda Motor Corporation. I've called Mazda @ (800) 222-5500 several times during the past (5) five months and asked what progress has been made in repairing the electrical ABS brake defect.

Mazda Customer Assistance Center in Irvine, California has indicated that pursuant to this recall, Mazda HAS NOT been able to replace this defective part at this time!

Mazda has recommened that "I park my vehicle outdoors and away from structures to prevent an unattended potential fire from spreading in the unlikely event the Mazda Tribute's ABS Brake MODULE develops an electrical short."

I need your help !!!
