Exactly one year ago my wife [REDACTED] and I entered our car, a Honda Accord 1997 model. Vin#. 1HGCE6648VA [REDACTED].

The car was parked in the back alley. The speed was not more than 5 m/ hr. The car then suddenly accelerated. The only option I had was to hit a building before I enter the Main Street where a huge pedestrian were present. My wife broke her ribs and leg injured. Had it not been for the air bag, safety belt and the tire that hit the wall we wouldn't have survived. I suffered burn on my hand, when the air bag exploded. Called 911 and the ambulance took us to George Wash Hospital My hand got burned when the air bag burst. suffered also a back pain, that I was treated at George Wash. Hospital for a long time. My wife [REDACTED] is still being treated. For further follow up, the police report can explain better. Please let me know what I need to do next.
