On April 13, 2012, July 18, 2012, and on August 3, 2012 while making a slow turn into a parking area, my 2006 Hyundai Sonata suddenly accelerated uncontrollably for no known reason. In each instance an accident resulted with major damage to other property and major damage to the front end of the 2006 Sonata. My only guess is there is something wrong with the vehicle's speed control.
