Ref. No. 10482194

Dear [REDACTED]

Thank you for your correspondence concerning your model year (MY) 2012 BMW 550ix equipped with Goodyear Eagle LS-2 RunOnFlat tires (size P245/40R19). The National Highway Traffic Safety Administration's (NHTSA) Office of Defects Investigation (ODI) received your correspondence. We regret any inconvenience our delay in responding may have caused you.

NHTSA is the Federal agency responsible for improving safety on our Nation's highways. We are authorized to order manufacturers to recall and repair vehicles or motor vehicle equipment when our investigations indicate that they contain safety defects in their design, construction, or performance. We also monitor the adequacy of manufacturers' recall campaigns. In order for the agency to initiate an investigation, we look carefully at the body of consumer complaints and other available data to determine whether a defect trend may exist. We do not have authority to act on isolated problems or resolve disputes between individual owners, dealers, or manufacturers.

You indicate that three of the Goodyear Eagle LS-2 RunOnFlat tires equipped on your MY 2012 BMW 550ix have developed bubbles in the sidewalls. This condition caused one of the tires to shred. In addition, you state the drivetrain malfunctioned resulting in a loss of power and you could not maintain the posted highway speed. You want to make NHTSA aware of these problems and believe they pose a safety risk to motorist.

ODI is monitoring all available data concerning Goodyear Eagle LS-2 RunOnFlat tires; however, no determinations have been reached at this time. Also, we have reviewed our database in an effort to identify whether a safety defect trend exists with regard to reduced motive power in MY 2012 BMW 550ix vehicles. At this time, there is insufficient evidence to warrant opening a safety defect investigation for this problem. The information you provided has been entered into our database. It will be considered with future reports to identify any safety defect trends that may require our attention. The NHTSA investigation and recall process is on our web site at www-odi.nhtsa.dot.gov/recalls/recallprocess.cfm.

Should you encounter a safety-related problem with a motor vehicle or motor vehicle equipment in the future, we would appreciate it if you would complete an electronic Vehicle Owner's Questionnaire online at www.nhtsa.gov or call the Auto Safety Hotline at 1-888-327-4236. Also, a summary listing of vehicle owners' complaints, safety recalls, manufacturers' service bulletins, etc. can be obtained at our web site.

Sincerely,

A handwritten signature in cursive script that reads "Randy Reid".

Randy Reid, Chief
Correspondence Research Division
