The Chevy Malibu 2008 door latch on the passenger side does not work. It has to be opened and closed manually. When you buy a new car and pay that much money for it you expect the doors to work properly for the life of the car - as I did for my other cars. This is wrong and it should be taken care of by the manufacturer whether it's under warranty or not - this is just good business practice. ALSO, my front headlight leaks inside when it rains. This is totally uncalled for. I've driven almost 50 years and this has NEVER happened to any of my cars. This also needs to be taken care of.
