

Dear NATSA

It's been more than a month that I've made a report with you regarding my 1999 Honda Civic how the car would stall in the freeway. I want American Honda to reimburse me all my money because it was the ignition switch plus days of work I missed and for diagnostic that was done to find out the problem.

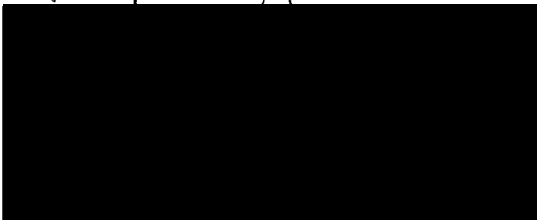

ODI number 10493344

Can you email me and let me know what's going on with this claim.
