Accident; December 22, 2013

Ladies/Gentlemen,

I was involved in an accident as referred above, where I hit another vehicle and the common term for this type of hit is known as "T-BONE" where the complete front end of my car was damaged to the tune of \$8300.00 +. Pictures of the damaged vehicle are included for your perusal.

As a result of this accident I suffered a broken T1 vertabrae, for which I'm receiving treatments .

The reason for my writing is, during such a horrific accident the airbag(s) should have deployed but did not, so I thought that Hundai might have an interest in what appears to be faulty with the airbag system on this car.

The car is being repaired and we requested that all the parts be saved for references and inspection.

I trust that following your review of the pictures I will hear from you on your conclusion.

[REDACTED]
Yours truly,
