To Whom it CONCERN

FEB 25 2014

It is too late for me. I have  
written - called & showed my card  
to dealer - They took pictures & I  
also send pictures

Since 2008 I have complain  
to Honda about my 2008 CRV. Have  
talked to Honda till I am blue in  
face.

I know This does not have any-  
thing to do with The Running of the  
vehicle. My problem is the paint  
IT started in 2008 a ster worry  
ran out. White spots That was  
on Hood went to Roof Now  
around windows. But not on  
sides of car & back of car  
Honda said it was the SUN  
But last week my son-in-law  
had his 2007 Civic recall because

AM  
22614  
SMD

II

of Paint - was doing same as my  
2004 CRV & oxidization is occurring  
Honda is painting His car

If you look on internet you  
will see 100's of people with  
cars from 1998 Accord to 2013 CRV  
Accord - Civic - CRV - Has Paint  
Problems.

I am 75 yrs old when I purchase  
Honda I was 65 yrs old - Paid Cash  
1<sup>st</sup> New car I have ever owned  
IT is 10 yrs old only have 65,000  
miles on it - I do not drive  
too far - So far Recall on this  
car - seat belts 3/10 Air bags 2/12  
low beams 5/12 car locks 7/9  
Had Fixed Air Cond 5/9 - Air Fuel Sensor 1/11  
Paid myself -

I know this is not a  
safety problem but I  
Thought you should know

III

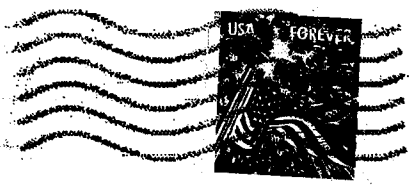

There was a problem with Paint  
as far back as 1998 Till 2013  
And Honda Knows & is not  
doing anything about it

I Thank you for listening  
to me
