Mr. Reid,

I am anticipating correspondence from you, concerning the rusted floorboards issue that is present in my Nissan Altima. Once again, sir, the rusted floorboard issue is a safety matter. Fumes will enter the cabin. What am I missing by branding this condition, a safety concern? I have completed & submitted all of the forms that your agency sent to me. I have submitted 8" by 10" color photos of the rusted floorboard area. I have heard nothing.

Please address this safety issue. I am not the sole person with this manufacturing workmanship gross negligence by Nissan. I am certain that you are aware of our collective concern. [REDACTED] rusted floorboards, if you need a refresher. Thousands of citizens are victims of Nissan's negligence. There exists absolutely NO misinterpretation.

Sincerely,

[REDACTED]
