Subject: FW: 2005 Tacoma Frame failure
Date: Monday, June 09, 2014 9:19:00 AM

Is there an extended warranty or some other action on this?

Subject: 2005 Tacoma Frame failure

Dear Mr. Borris,
I am the owner of a 2005 Toyota Tacoma. My dealer has informed me that my trucks frame has failed due to extreme rust perforation and is not safe to drive. In searching the NHSTA data base, there are hundreds of similar complaints for frame failures in model years 2005-2008 for the Tacoma model. Toyota denies there is a problem. Most auto owners would not consider that they should be inspecting the structural components of their vehicles for safety issues, which means that there are hundreds if not thousands of structurally compromised trucks on the road right now.
What are our options in regards to remedying this issue?
Thank you for your time and consideration,
[redacted]
