Each time I was beginning to brake when the engine revved up. I stopped the problem while pressing harder on the brake (I did not move my foot) I was lucky as I drive defensively and saw a problem ahead of me before it became an emergency.

Narrative Description of Incident(s), Failure(s), Crash(es), and Injury(ies)

When Applying brakes lightly, engine revved up and car did not slow down until I put large amounts of pressure on brake.

I was braking at the time of the incident and in order to slow the car and prevent an accident, I had to jam on the brake. As this happened 3 times, I sold the car. Toyota insisted it was operator error. It was not. Driving that car scared me.
