**Narrative Description of Incident(S), Crash(es), and Injury(ies).**  
Please describe (1) events leading up to the failure, (2) failure and its consequences, and (3) what was done to correct the failure; i.e. parts repaired or replaced (and if old part is available).

TL\* THE CONTACT OWNS A 2006 HYUNDAI SONATA. THE CONTACT STATED THAT THE FRONT PASSENGERS OCS SENSOR DID NOT DETECT AN OCCUPANT WHEN THE SEAT WAS BEING UTILIZED. THE VEHICLE WAS TAKEN TO A DEALER WHERE IT WAS DIAGNOSED THAT THE FRONT PASSENGER SEAT AND SENSOR NEEDED TO BE REPLACED. THE VEHICLE WAS REPAIRED ON THREE OCCASIONS BUT THE FAILURE RECURRED. THE MANUFACTURER WAS NOTIFIED OF THE FAILURE AND STATED THAT THE VEHICLE WAS PREVIOUSLY REPAIRED UNDER NHTSA CAMPAIGN NUMBER: 08V161000 (AIR BAGS). THE FAILURE MILEAGE WAS 40,000.

Include, if available: Police/Fire Department Report, Photos, and Repair Invoice. ATTACH ADDITIONAL SHEETS IF NECESSARY

The Privacy Act of 1974-Public Law 93-579 This information is requested pursuant to authority vested in the National Highway Traffic Safety Act and subsequent amendments. You are under no obligation to respond this questionnaire. Your response may be used to assist the NHTSA in determining whether a Manufacturer should take appropriate action to correct a safety defect. If the NHTSA proceeds with administrative enforcement or litigation against a manufacturer, your response, or a statistical summary thereof, may be used in support of the agency's action.

p.1

**Narrative Description of Incident(s), Failure(s), Crash(es), and Injury(ies)**

On my 2006 Hyundai Sonata there has been issues with the passenger OCS airbag since my purchase in June of 2007. I didn't think that there was a potential "issue" until I got a recall notice from Hyundai in 2008 and at this time I have already driven over 20,000 miles with an airbag that doesn't work properly. When I took it into the dealership to see if my car was malfunctioning to Hyundai standards they agreed that it was not working properly & proceeded to point out that my car had been in an accident. If I knew I asked how they knew & they said because the front left fender was a different color, we then noticed the

ATTACH ADDITIONAL SHEETS IF NECESSARY

dashboard being cracked. The seat & dashboard were replaced and then again in 2008 at 46,205 miles there was another malfunction & the seat was replaced again. Then in 2013 there was another malfunction so when I was getting it replaced again in 2013 I decided to file a complaint with the Better Business Bureau, not only has this been an ongoing problem with this specific vehicle, there was probably an issue before I purchased it as well. After a long process with the BBB, they dropped my case, opened it back up, and in November 2013 I finally got a hearing and it ruled for Hyundai. Now again in January of 2014 I had another malfunction with my passenger airbag & then again when I myself was personally sitting in the passenger seat in March of 2014. I contacted my case manager from the BBB frustrated, about to go to the media & she urged me to contact the US Department of Transportation and the National Highway Traffic Safety Administration. As of today with almost 170,000 miles on my vehicle I know that the airbag for my passenger does not work properly at every given time. This was a concern of mine when I took the car in for repairs the second time. The airbag only seems to work selectively. I know the seating & weight requirements for the airbag to work properly, but that doesn't matter when the airbag itself doesn't work properly.

Dear Consumer:

As a follow-up to your report to the Vehicle Safety Hotline (VSH), we have recorded your information on the enclosed Vehicle Owner's Questionnaire (VOQ) form. Please review the form and make changes, additions and corrections as necessary. Additionally, please provide a more detailed description of the failure(s) you reported that you believe relevant to safety. Also, if available, include copies of repair invoices, letters to the manufacturer, or any other document related to the problem(s) you reported. If a crash or fire occurred, include a copy of the police or fire department report.

It is helpful to be as thorough as possible in your report so that our ability to use your report will be maximized. If you do not have the information, it is not necessary to complete all the boxes. However, it is very difficult to identify the scope of a vehicle problem unless the vehicle identification number (VIN) is known. The VIN is located inside the vehicle on the dashboard adjacent to the left (driver's side) of the windshield pillar and on the drivers' door or the driver's door jam. It may also be listed on a dealer repair invoice or your insurance or registration cards. When reporting a tire problem, the brand name, tire line and complete tire size should be included. Be certain to provide the DOT tire identification number. It is usually located near the rim flange of the tire on either side of the tire.

We do not make your personal information (name, address, phone numbers, etc.) available to the general public. However, if we open an investigation that involves your vehicle, we will provide the manufacturer of your vehicle with a complete copy of your report. The information you provide may assist the manufacturer and NHTSA in determining if a safety-related defect exists.

Any information provided is entirely voluntary. There is no consequence or penalty of any kind if you do not wish to provide it. We seek this information to develop both statistical and investigative evidence that will help identify potential safety related problems in vehicles or vehicle equipment, e.g., tires, child safety seats, jacks, etc.

When completed, please fold and staple or tape the form so that the pre-addressed portion of the form is on the outside. If a larger envelope is used, tape the VOQ form to the larger envelope so that the pre-addressed portion of the form is showing.

If further assistance is needed, please contact the VSH at their toll-free number, 1-888-327-4236.

Thank you for your cooperation.

Sincerely,

Randy Raid Chief  
Correspondence Research Division  
Office of Defects Investigation  
Enforcement

*lived in Ohio for a year, I do  
 have complications with my rear-end?*

## IMPORTANT SAFETY RECALL

This notice applies to your vehicle, 5NPBU46F86H [REDACTED]

Dear Hyundai Sonata Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Hyundai has decided that a defect which relates to motor vehicle safety exists in certain 2006 through 2010 model year Hyundai Sonatas. This recall affects such vehicles registered in and operated in Connecticut, Delaware, Illinois, Indiana, Iowa, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, West Virginia, and Wisconsin, and the District of Columbia (the Salt Belt).

### What is the problem?

- During winter months, large quantities of salt are used to de-ice roads in the Salt Belt states, noted above. Road salt and water can enter portions of the rear crossmember leading to corrosion of the crossmember steel. As the corrosion progresses, it may lead to thinning or perforation of the crossmember steel. In advanced cases, crossmember corrosion can result in detachment of one of the inboard control arm mounting points. If the connection between the rear crossmember and a control arm separates, handling of the vehicle may be adversely affected, increasing the risk of a vehicle crash.

### What will Hyundai do?

- The rear crossmember will be inspected for corrosion damage. The dealer will measure the thickness of the steel in the rear crossmember. Rear crossmembers that do not require replacement will be treated with rust-proofing material to arrest the corrosion process. If specified levels of corrosion damage have occurred, the rear crossmember will be replaced with a new crossmember assembly with rust-proofing material applied. This procedure will be performed at no charge to you. It is always suggested that customers contact their local Hyundai dealer to schedule a service appointment. The dealer can advise you on the time needed for the repair.

## MOTOR VEHICLE RECALL

Dear 2006, 2007 or 2008 Sonata Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Federal law requires that any vehicle lessor receiving this recall notice must forward a copy of this notice to the lessee within ten days.

Hyundai has decided that a defect, which relates to motor vehicle safety, exists in certain model year 2006, 2007, and 2008 Hyundai Sonata vehicles.

### What is the problem?

Your Sonata is equipped with an advanced air bag system meeting all federal regulations, which features an Occupant Classification System (OCS) in the right front seat. The purpose of the OCS is to disable the right passenger seat front air bag when it detects the presence of a child restraint system or small child in the right front seat. The right front air bag is disabled to prevent injuries to a child that may result from right front air bag inflation during a crash.

The OCS installed in the right front seat of your vehicle may misclassify a small stature adult as a child. This would cause the "PASSENGER AIR BAG OFF" lamp to illuminate and would deactivate the passenger front air bag. Misclassification of a small stature adult as a child in the right front passenger seat may cause the right front air bag to not inflate in an accident that merits air bag deployment and may result in injury to the right front occupant.

### What will Hyundai do?

If your vehicle's "PASSENGER AIR BAG OFF" lamp illuminates while the right front seat is occupied by an adult or if your vehicle's "AIR BAG" warning lamp is illuminated, we are asking you to schedule an appointment as soon as possible to take your vehicle to your Hyundai dealer. The Hyundai dealer will check your vehicle to confirm that the OCS is not properly recognizing an adult passenger. After confirmation, the Hyundai dealer will remove the right front seat cushion assembly and send it to an evaluation and repair station, which will inspect the right front seat cushion assembly OCS for proper operation and then will reprogram the OCS, if necessary, to provide a greater margin of recognition for adults seated in the right front seat. This procedure will be performed at no charge to you. You should plan to leave your vehicle at your Hyundai dealer to have this service performed. Hyundai will provide you with a vehicle at no cost for your use while your vehicle is being serviced.

This reprogramming is not recommended for most vehicles and is not an upgrade or enhancement. The reprogramming is only intended to improve the capability of the OCS to recognize a small segment of adult seated passengers.
