Dear Sir or Ms:

Back in January of 2014 I received a safety recall notice for my 2011 Dodge 3500. I brought it to my local dealer Jack Wolf Chrysler/Dodge and was told that I needed the part replaced and it should be about 4-5 weeks until the part would be in.

I have checked back with them several times and still no part. When I questioned why it is taking so long I was told they cannot order the part and Chrysler Corp. only sends a few at a time.

I explained that we pull a very large 5th wheel RV and I am a little concerned. They told me they have only seen one break and if something should happen I could sue Chrysler. This was not the answer I was looking for! I just want my family to be safe! Any help from you to rectify this matter would greatly be appreciated.

Sincerely,

ET
