8-4-14

To whom it may concern:

AUG 14 2014

I am the second owner of a  
2012 Fiat 500, with 55 K miles on  
it. But I'm not sure if I'm the  
second owner or not.

Anyway the car runs good  
and gets good gas mileage, but  
the ~~"Generic"~~ "Generic Warning Light" came  
on and I don't know what triggered  
it to come on.

I know one thing could have  
caused it to come on is that I have

NM  
8/25/14  
SMD

Been using ~~regular~~ regular fuel,

about 87 octaine insted of 91 octaine.

But The book says that 87 octaine is acceptable.

Could you tell me what it could probly be.

And I would also like to know how close is the nearest Fiat dealership is from my location

I live about 25 miles north of

Milledgeville, GA 31061 East of

Macon, GA.

your response is very important to me and I thank you.
