**Narrative Description of Incident(s), Failure(s), Crash(es), and Injury(ies)**

There was no Accident involved with this Failure, The Frame had a hole rusted 1/2" x 6" at point of connection with front cross member, which also supports transmission. Toyota has had excessive rust problems on frames of Tundra trucks of this year. I was told this part of the frame was not covered on thier recall. Should you see more complaints for this section of the frame it should be brought to public attention.
