AUG 28 2014

To Whom it may concern:

8-18-14

My name is [REDACTED] and I have a 1999 Chevy Lumina and I understand it has been on recall for several things.

I took and got this car in 2010 and I was going down to Columbus from Tiffin and car cut out on me. Had to have it pulled in to find out the ignition went out. Then working in Findlay afternoon shift, going home to tiffin smelt wire and my wiring harness in the steering column went out.

The EGR valve had to be changed twice and I took it back to a mechanic and he told me to get ahold of General Motors cause my car has been on recall. I've been having problems with the shifting and transmission man told me for only 135,000 miles it shouldn't be doing this and the transmission has had ring problems from the get go of these cars. The heater never shuts off and air conditioner is locked so no-one can fix it cause it's GM recall also. Well either I get answers, car fixed, or all that

AM

9/2/14

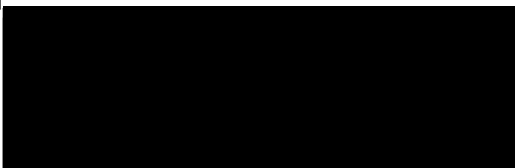

SMD

I spent on all the parts, or
I will visit the Law Suit group.

Thank You!

I've owned many chewy's
but nothing liked this!
Also letters went to
Michigan office no returns
and no answers
