

OCT -7 2014

My name is [REDACTED] I purchased a new truck in 2005 I recently found out that the vehicle may have been an accident so I pulled my paperwork out and was reading over my Maroni label and noticed it didn't have the dealers address dealers name and then I found another Maroni label with the same Vin number but with another address to read Nissan with a series of codes across the bottom of the second Maroni label the first Maroni label that was on my vehicle Nissan USA has no record of it the invoice that was an envelope inside my glovebox never affixed to the car as you can see uses peel here on the window sticker when the vehicle comes off the assembly line they affix a safety sticker to the door pillar there also required that the Maroni label on that time even printed on the right side of Maroni label says this label has been applied pursuant to federal law do not remove prior to delivery to the ultimate purchaser so I have 2 Maroni labels same Vin number different dealer addresses different codes and the one I purchased doesn't match Nissans records which according to the federal law makes my safety sticker null and void I am sending a copy of each one at your request this is a very big problem for me because if I sell this vehicle then I am committing a crime.
