Washington, D. C. 20590

Dear Recall Administration,

DEC 29 2014

Please issue a recall on 1995 Dodge Intrepids. For years we were driving our 1995 Dodge Intrepid and it would quit on us while driving. At that time the power steering would not work and it was difficult to pull over to the side of the road. If hit, I'll bet that the air bags would not deploy.

We had the car to our mechanics and they could not figure out what was wrong. We had the car to the dealer and they could not figure out what was wrong. (Copy of vin number enclosed.)

Recently we saw on TV the recalls for other vehicles that this was happening with. So we took our 1995 Dodge Intrepid to Hometown Auto in Verona, WI on 10-17-14 and had the ignition switch replaced. Since that time, we have not had a problem.

It cost us \$100.00 for the ignition switch and \$70.00 labor = total \$179.35 which we would like to be reimbursed for (invoice enclosed). How do we get reimbursed?

Please add 1995 Dodge Intrepids to your list for recalls for new ignition switches.

Thank you,

Madison, WI
