IMPORTANT SAFETY RECALL

September 2014

[REDACTED]
Saint Paul, MN [REDACTED]

Dear [REDACTED]

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

General Motors has decided that a defect which relates to motor vehicle safety exists in your 2005 model year Pontiac Grand Am. As a result, GM is conducting a safety recall. We apologize for this inconvenience. However, we are concerned about your safety and continued satisfaction with our products.

IMPORTANT

- This notice applies to your 2005 model year Pontiac Grand Am, VIN 1G2NW12E95M [REDACTED]
- Your vehicle is involved in GM recall 14350.
- **Until the recall has been performed, it is very important that you remove all items from your key ring, leaving only the vehicle key. The key fob (if applicable), should also be removed from the key ring.**
- Schedule an appointment with your GM dealer on or after October 1, 2014.
- The recall repairs will be performed for you at **no charge**.

Why is your vehicle being recalled?

If the key ring is carrying added weight and the vehicle goes off road or experiences some other jarring event, it may unintentionally move the key away from the "run" position. If this occurs, engine power, power steering and power braking may be affected, increasing the risk of a crash. If the ignition switch is not in the run position, the air bags may not deploy if the vehicle is involved in a crash, increasing the risk of injury or fatality.
