IMPORTANT SAFETY RECALL**L25 / NHTSA 14V-373**

This notice applies to your vehicle (VIN:2A8HR54P18R [REDACTED])

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Dear [REDACTED]

Chrysler has decided that a defect, which relates to motor vehicle safety, exists in some 2008 through 2010 model year model year Chrysler Town & Country and Dodge Grand Caravan, and some 2009 through 2010 Dodge Journey vehicles.

The problem is...

Upon starting your vehicle the Frequency Operated Button Ignition Key (FOBIK), may not fully seat in the "ON" position. If not fully seated, under certain operating conditions (for example bumpy roads) the FOBIK could inadvertently move to the "Accessory" mode. This could cause unintended engine shut off and the passive restraint systems, including the airbags to shut off. This could increase the risk of a crash under certain driving conditions and increase the risk of occupant injury during a crash.

What your dealer will do...

Chrysler intends to repair your vehicle free of charge (parts and labor). However, the part required to provide a permanent remedy for this condition is currently not available. Chrysler is making every effort to provide the part as quickly as possible. Chrysler will contact you again by mail, with a follow-up recall notice, when the remedy part is available.

What you must do to ensure your safety...

Once you receive your follow-up notice in the mail, simply contact your Chrysler, Jeep or Dodge dealer right away to schedule a service appointment.

Until this repair is completed, the vehicle can be driven. However, as a precaution, all drivers are advised to remove all objects from the FOBIK (such as additional keys, key chains, etc.) and ensure that the FOBIK is securely and correctly aligned in the "On" position and not aligned between the "On" and "Accessory" position before driving the vehicle.
