JUN 1 - 2015

I have previously contacted your office to get permission to have my airbags cut off, due to the threat to my life. I have a 2004 Avalon Toyota which has the Takata part that will if deployed shoot out shrapnel and could kill anyone in the car. Toyota here told me that my vin # and car is in this category.

I indeed got a letter back from your office in agreement with me that I could have my airbags cut off. However, the place that was referred to me in the Memphis area who could do this upon my request, stated that they would not cut off my airbag and be responsible.

I felt at that time that there was no one left to do this and somehow

I misplaced my letter which I received from you stating I was being given permission to get this done.

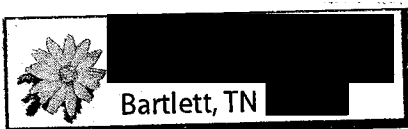

I am requesting you to forward to me the duplicate of the original I had formerly received, so that I may try again to get this done. I can't sell my car or trade it due to this problem. It is truly a matter of life and death as I see it. Please I beg you to help me in this matter.

Send to Me:

Bartlett, TN

Thanks.
