Mileage Reported: 125487

ID #: [REDACTED]

VIN: 1G2WP121\*WF\*\*\*\*\*

**Definition**

Code P0300 indicates that there were too many random cylinder misfires within a predetermined period of time.

**Error Codes Read**

P0300 Random Misfire Detected

P0300 Random Misfire Detected

**Ignition Coil****How It Works:**

An ignition system component that produces high voltage for the spark plugs. As battery current passes through the internal coil windings, voltage builds. When the battery current is shut off, the field collapses and the coil produces (discharges) a high voltage which is directed to the spark plugs. Contact points, the pick-up coil or reluctor assembly, hall effect switch or crankshaft positioning sensor, are all devices used to turn the battery voltage to the coil on and off at the correct time.

**When It Doesn't Work:**

If the coil is unable to produce sufficient spark voltage, the vehicle will run poorly or not at all.
