NOV -4 2015

I am writing due to my concern over a recall notice I received from Chevrolet. The notice is GM Safety Recall 15031 and is dated June 2015. The notice states that "in a crash, a fatigued cable could break...increasing the risk of injury to the occupant." The notice also states that parts to repair my vehicle are not currently available and that Chevrolet is working as quickly as possible to correct this condition.

My concern is that this is the beginning of November and nothing has happened. Almost a half of year has gone by and they still don't seem to have the parts to correct this situation. Chevrolet doesn't seem to take these recalls seriously until there is a fatality.

Is there some kind of NHTSA regulation that these car companies must follow to correct these recall situations. It is hard to believe that a half a year is considered "working quickly" to correct this condition.

Thank you for your response,

NAM

Recalls Results by VIN - Vehicle Identification Number

[Print](#) VIN: 1G1ZB5E07CF 

Year: 2012 Make: Chevrolet Model: Malibu

Number of Open Recalls: 1

NHTSA Recall Number: [15V269](#)
Manufacturer Recall Number: N150031

Recall Date: May 6, 2015

SUMMARY:

General Motors has decided that a defect which relates to motor vehicle safety exists in 2011-2012 model year Chevrolet Malibu vehicles. The flexible steel cable that connects the safety belt to the vehicle at the outside of the front outboard seating positions can fatigue and separate over time as a result of occupant movement into the seat.

SAFETY RISK:

In a crash, a fatigued cable could break, reducing the effectiveness of the vehicle's safety belts and increasing the risk of injury to the occupant.

REMEDY:

Dealers will replace the outboard lap anchor mounting bracket to re-locate the tensioner 30mm rearward. Dealers will also inspect the cable, and if necessary, replace the lap pretensioner. These repairs will be completed free of charge.

RECALL STATUS: Recall INCOMPLETE. Remedy not yet available**MANUFACTURER NOTES:**

Visit manufacturer website at <https://my.gm.com/recalls> for more information.

THIS RECALL DATA LAST REFRESHED: Oct 28, 2015

Additional Safety Information

Besides the VIN search tool you just used, NHTSA offers additional safety information based on a vehicle's make, model, and model year and not tied to any particular VIN. A search by vehicle make, model, and model year gives you access to information about technical service bulletins, NHTSA investigations, and owner complaints, as well as safety recalls on aftermarket equipment that is often not linked to a particular VIN or even to your vehicle's manufacturer.

To search NHTSA's safety information based on your vehicle's make, model, and model year, please go to the [Safety Issues section](#) and follow the instructions there.

Recall information for this manufacturer is only available going back to August 20, 1999. If your vehicle was manufactured before this date, please contact the manufacturer for possible additional recall information.
