IMPORTANT SAFETY RECALL

150425GTDN [redacted] 7069 0021479

SEDONA, AZ [redacted]

Hummer  
Recall Recall

H3

August 2015

Dear [redacted]

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2006 model year Hummer H3 vehicles. As a result, GM is conducting a safety recall. We apologize for this inconvenience. However, we are concerned about your safety and continued satisfaction with our products.

**IMPORTANT #**

- Your vehicle is involved in GM safety recall 15042.
- **Parts to repair your vehicle are not currently available.** When parts are available, we will send you another letter asking you to contact your GM dealer to arrange a service appointment.
- This service will be performed for you at **no charge**.

**Why is your vehicle being recalled?**

The connector module that controls the blower motor speed in the heat/vent/air conditioning (HVAC) system may overheat under extended operational periods at high and medium-high blower speeds. If this condition occurs, there is the risk that the heat generated could melt the plastic surrounding the connector module, ~~which increases the risk of a fire.~~

**What will we do?**

**Parts to repair your vehicle are not currently available,** but when parts are available, your General Motors dealer will replace the female connector and harness. This service will be performed for you at **no charge**.

We are working as quickly as possible to correct this condition. When parts are available, we will send you another letter asking you to take your vehicle to your General Motors dealer to have your vehicle serviced. You can also check the status of this recall at [www.my.gm.com/recalls](http://www.my.gm.com/recalls).

**Do you have questions?**

If you have questions or concerns that your dealer is unable to resolve, please contact the Hummer Customer Assistance Center at 1.800.732.5493 (TTY 1.800.833.6537).
