<p>The Privacy Act of 1974-Public Law 93-579 This information is requested pursuant to authority vested in the National Highway Traffic Safety Act and subsequent amendments. You are under no obligation to respond to this questionnaire. Your response may be used to assist the NHTSA in determining whether a Manufacturer should take appropriate action to correct a safety defect. If the NHTSA proceeds with administrative enforcement or litigation against a manufacturer, your response, or a statistical summary thereof, may be used in support of the agency's action.</p>							

Narrative Description of Incident(s), Failure(s), Crash(es), and Injury(ies)

My car would slow down, then pick up speed on its own. I took it to a Garage & he said it was the oxygen sensor. Said this was the second tail blazer he had seen, that done this. And it was dangerous by it picking up the speed. Don't know if anyone else has said anything, but I think its something that needs to be checked out. I'm sending a copy of his report, and what it cost me to get this fixed. Wasn't no recall on this that I knew of. (But please check it out) Thank you
It would stall out to

Sometimes it would stall
out was afraid to pull out
in traffic, didn't know when
it was going to stall out.
Sometimes it quit running.
Had to re-start it.
So you all really need to
check & see what can be
done. Someone could get
killed or hurt badly.
