I have a 2013 Motorola Bravo smartphone. I have a 2015 Dodge Dart SXT with bluetooth. I cannot pair my cell phone to my car. I was told by Consumer Cellular that my phone was obsolete and would not pair with newer cars. I feel there is the need for some regulation here. I am wondering how many deaths there are due to texting and driving. With bluetooth you can text and drive and talk on your cell phone and drive but only if they work. Please let me know by mail that someone is working on this and also how many deaths are there annually blamed on either texting and driving or cell phone use and driving.
