

INFORMATION Redacted PURSUANT TO THE FREEDOM OF
INFORMATION ACT (FOIA), 5 U.S.C. 552(B)(6)

9-27-2016

OCT -4 2016

This is in regards to Ref# [REDACTED]
in reference to a Toyota Tundra 2004
pick-up with Alum. rims.

These rims leaked air very bad, especially
in cold weather, which needed attention
once a week, also had to carry air tank
in case of emergency. These rims were
so badly deteriorated they could not be
cleaned and resealed, as no-one wanted
that responsibility.

They told me it was a wonder the
tires stayed on the rims.

I had these rims replaced with steel
rims.

I know at this time there is no
recall on these rims, but I want to
bring this to your attention in case of
accidents.

Thank-you
