Dear sirs;

I recently made an appointment for air bag replacement on my 2005 Pontiac Vibe and was informed that only the passenger side air bag will be replaced. I read a note on the internet dated 5/19/2005 that Takeda declared that DRIVER'S SIDE airbags in 2004-2007 Pontiac Vibe are at the HIGHEST RISK. I contacted General Motors and was told that they would not replace the driver's side air bag until ordered to do so by the Highway Traffic Safety Administration. I wonder why the TSA has not ordered the recall after over eight months, and wonder if such an order might be issued soon.

Sincerely,
[REDACTED]
