Courtesy Inspection

Customer Concern: 32 Point Visual Courtesy Inspection

Diagnosis:

Items found during inspection:
-2 front hub assemblies are very bad
-both rear drive line u-joints are bad
-front differential stub shafts have damaged splines
-front drive line CV boot broken
-front CV axles have a lot of play and the drivers side is missing
-LF upper ball joint is bad(recommend replacing in pairs)
-lower ball joints are worn and have play
-RF shock damaged and all 4 shocks have worn out bushings
-Transfer case output shaft seal leaking
-Rear differential pinion seal leaking.
-loose bolts on front compensation brackets(tech tightened all loose bolts on the brackets)
-4 wheel alignment
-front caliper/rotors wearing unevenly.

Recommendation:

Safety issues:
-front hub assemblies
-rear drive line u-joints (both)

Other issues:
-rebuild front drive line
-replace front differential stub shafts and perform fluid flush
-replace front CV axles
-replace front upper control arms (upper ball joints)
-replace lower ball joints
-replace all 4 shocks
-replace transfer case output shaft seal and perform a fluid flush
-replace rear differential pinion seal and perform a fluid flush
-perform a 4 wheel alignment
-replace front brake calipers, rotors, and pads.
