RE: VIN 1NXBR30E76Z [REDACTED]

APR -8 2016

NATIONAL TRAFFIC SAFETY ASSN.

Dear Administrator:

1200 New Jersey Ave. S.E.  
Washington, D.C. 20590

A safety recall notice (interim notice) was received in August, 2015. Seven months have passed.

The notice stated that they were currently preparing parts for my location. It also stated that another notification would be sent once sufficient parts were produced and the remedy would be performed.

It was recommended that the vehicle be not operated with an occupant in the front passenger seat. Most of my passenger-friends are seniors. You can imagine how hard it is for them to sit in the back.

After waiting for more than half a year, how much longer must one wait before this remedy is performed?

What is a reasonable time?

Please respond as soon as possible.

Sincerely,

[REDACTED]
