MAY 11 2016

Hello my name is [REDACTED] I got
a Honda 2013 PCX-150cc The motor that was new
at that time I got the chain in the motor when
bad inside now it makes a loud sound
I been told that its because of
wear done on my chain it started
around 5,000 miles in my 150cc motor
Does any other Honda PCX-150cc
have this happen inside the motor
can you check into it and see
if they need to recall on this model
and let others know about it
I have a Honda Protection care plans
but I dont know if this is cover
under my plan where I could
get it done for free or not
my vin. MLK K F1212 DS [REDACTED]
contract with them can you
write me back on this
about my Honda PCX-150cc 2013

Thank you

P.S. check this out for me
